Electronic Design and Manufacturing

Hardware design and electronic manufacturing services from **Ademtek**

Electronics product engineering can be bifurcated into embedded software and hardware design and it is noteworthy that customized hardware design is a need in success of every product design. With our experience and expertise hardware design we have delivered top-notch hardware design solutions for our clients.

How does Ademtek help you with your electronic product development?
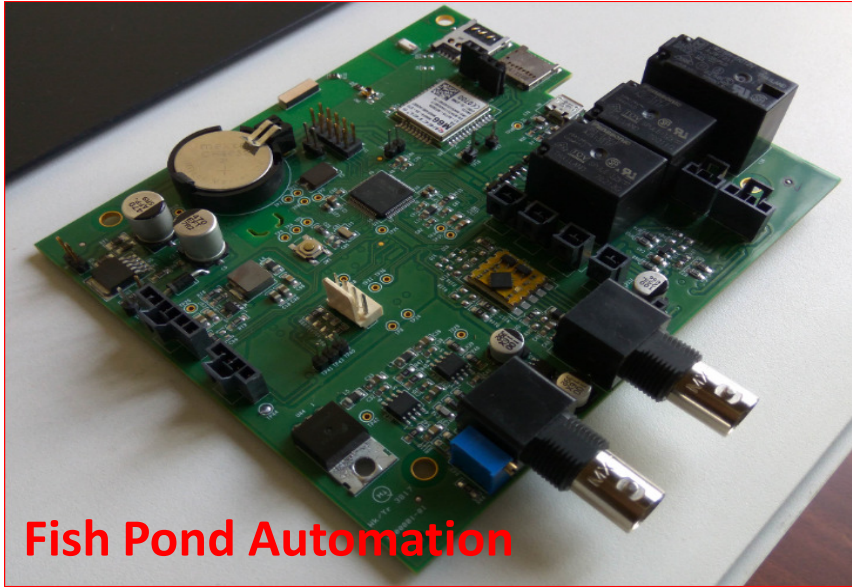

Electronics product Sourcing Services

➢Hardware design service
➢Engineering and manufacturing service
➢Contract manufacturing service
➢Electronic product development service

Project Consultancy Services

➢Get support on your hardware development from Ademtek's hardware specialists
➢Feasibility Study
➢Specification Consultation
➢Project Management Service

**Ademtek**

A few Designs from Ademtek
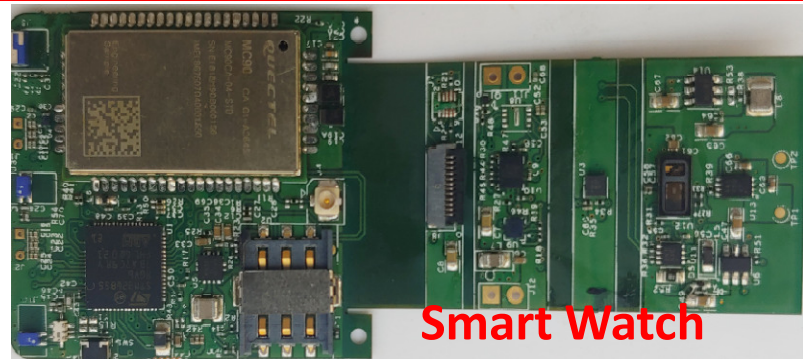

Fish Pond Automation
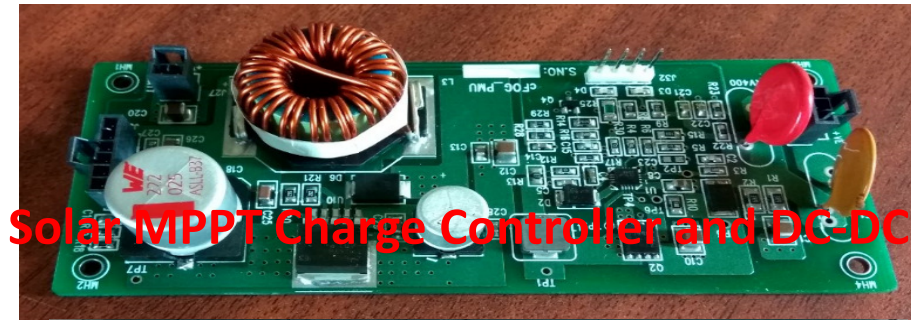

Mineral Exploration Geophysics Transmitter

Power supplies and Battery chargers

**Industrial IoT Gatewayn**

**Smart Watch**

Solar MPPT Charge Controller and DC-DC

Data Loggers

Fire/smoke sensor

Solenoid Driver

CPCI Mother Board

Antenna Position Unit
